

Ascend™ Lumbar Brace Family

Introducing Breg's new spine braces

The Ascend family of spinal orthoses is designed to elevate traditional spinal care to a new level. Molded support panels and improved circumferential stability combined with superior breathability and universal sizing make the Ascend line of products the elevated choice for patients who want to build confidence during recovery.

All of our lumbar braces have patient-centric design features, including:

- Lightweight and breathable Airmesh® padding
- Universal sizing
- Easy to fit with a streamlined ergonomic design
- 3:1 mechanical advantage lacer system
- Dual-pull lacer system with independent top and bottom adjustment
- Ergonomic pull handles
